U.S. Energy Services Announces Change in Leadership Due to Company Growth
Todd Overgard will be promoted to president and Bill Bathe will assume CEO role

MINNEAPOLIS (January 4, 2010) – U.S. Energy Services, a Minneapolis-based energy management company, today announced it has promoted Todd Overgard to president. Former president Bill Bathe will become the company's chief executive officer.

The change has been in the works for several years, based on planned reorganization within the company. The company's sustained success, new clients and a recent acquisition prompted the transition. The strategic move will allow Bathe to be more involved with strategic sales and strategy development.

Overgard, who will oversee all operations of the company, has been employed at U.S. Energy Services since 1999 and is well-versed in the energy industry. In his time with the company, he has learned the many aspects of the business in preparation for his new position. Overgard's previous experience at U.S. Energy Services includes account management, operations and finance.

"Todd has held many diverse roles at U.S. Energy Services and has expanded his expertise by recently earning a law degree," said Bathe. "He knows every facet of this company and has dedicated himself to our continued success. Todd has the support of everyone at U.S. Energy to be our next president. We are excited to make this important organizational change."

As part of the restructuring, Bathe will be actively involved in acquisitions and strategic sales. He will serve as chairman of the board of directors and will guide the company's international presence.

Overgard received his Bachelor of Science degree in mechanical engineering from the Milwaukee School of Engineering and an M.B.A. from the University of Wisconsin – LaCrosse. He is a registered professional engineer and has received an Executive Juris Doctorate from Concord Law School of Kaplan University.

About U.S. Energy Services
